

# REMIN<sup>®</sup> volcanic rock dust

SOIL AND COMPOST REMINERALISER

100% freshly crushed and finely screened, ancient rock from Scotland containing the full range of MINERALS & TRACE ELEMENTS to help produce fertile soil and compost and healthy, health giving plants.

## ORGANICALLY APPROVED

MINERALS & TRACE ELEMENTS are the smallest of our soil's 5 components and they are in decline in our diets.

Without them plants, like us, become weak and susceptible to pests and diseases.

As well as BETTER YIELD, FLAVOUR, COLOUR, etc, gardeners and allotmenters are noting a SIGNIFICANT REDUCTION IN PESTS AND DISEASES.

## SOIL'S 5 COMPONENTS

- 1 AIR
- 2 WATER
- 3 DECAYED ORGANIC MATERIAL
- 4 LIVING ORGANISMS
- 5 MINERALS AND TRACE ELEMENTS

“Like adding a HUGE VITAMIN PILL to my garden.”

Moira Davidson

Whilst J VON LIEBIG, 1803 to 1873, said “The yield of the crop is limited by the nutrient in shortest supply” it would appear REMIN's success is based on the healthy interactions

between 4 LIVING ORGANISMS and 5 MINERALS & TRACE ELEMENTS.

# REMIN<sup>®</sup> volcanic rock dust

contains the following naturally occurring

MACRO NUTRIENTS			MICRO NUTRIENTS			
(Na) Sodium	(P) Phosphorous	(K) Potassium	(Fe) Iron	(Mn) Manganese	(Cr) Chromium	
(Mg) Magnesium	(Ca) Calcium	(S) Sulphur	(Cu) Copper	(Mo) Molybdenum	(Se) Selenium	
(Cl) Chlorine	MACRO ELEMENT: (Si) Silicon		(Z) Zinc	(Co) Cobalt	(B) Boron	(I) Iodine

Plus over 40 more elements although not necessarily in elementary form!

## APPLICATION to SOIL and COMPOST

**TOP DRESSING:** Spread at any time of year unless frozen or windy conditions.

Minimum: 0.5 kg / m<sup>2</sup> (good handful / square yard) = 2 tonnes / acre

Booster: 2 kg / m<sup>2</sup> = 8 tonnes / acre

**MIXING:** Mix well with compost / soil at 1 kg per 50 Litres of compost. Do not inhale.

**PLANT POTS, TUBS, BASKETS:** Sprinkle level tablespoonful onto 15 cm (6 inch) surface diameter of compost or soil and water in as usual. Two applications per year.

**WATERING IN:** Put 1 cm in e.g. empty 2 lt milk container, fill with water. Shake, let settle and water. Refill. Lasts as long as water darkens. Please do not over water!

## APPLICATION TO WORMERIES

Worms love REMIN volcanic rock dust! Sprinkle small handful per 300 cm<sup>2</sup> (1 ft<sup>2</sup>) onto surface of your wormery every month. Try a small area with this amount and see the worms congregate.

## APPLICATION FOR COMPOST

Each time you add a new layer of compost to your compost bin or pile, add a light covering over the surface that you can easily see through. Helps gardening material break down into compost faster, reach a higher temperature and reduce odours.

**STORAGE AND SAFETY:** Store under cover. Do not apply in windy conditions.

## FIGHTING GREENFLY

No guarantee - Try hand spraying above "WATERING IN" mixture from an old drinking bottle with valved cap, onto infected plants. Please report your results back to us!

10 kg & 20 kg printed bags; 0.5 t & 1 t bulk bags and bulk loads available.
